P/N: ARNGFFM224I8M-128ANT   **A-RAY 2242 NGFF M.2 I800 128GB**

DESCRIPTION

I800 128GB is an SSD hard drive using a connection interface NGFF M.2 2242 controller. This is a SSD Industrial Series that delivers read/write speeds up to 550/500 MBps and Support TRIM, NCQ, S.M.A.R.T, ECC, Wear-leveling. System Support: Windows XP/Win7/8/10/11, Mac OS , Linux, embedded operating systems used in control, measurement, and applications such as: Music server, Automation control....

Precautions:

[1] The speed was tested by A-RAY and for the reference only.

[2] 1GB=1,000,000,000 Bytes. In OS system, it would be displayed as 1,000,000,000 Bytes/1024/1024/1024 = 0.93GB

[3] Definition and conditions of TBW (Terabytes Written)are based on JEDEC standard

[4] Transmission speed will vary according to different hardware/software conditions, therefore the data can only use for basic reference.

NOTES:

[5] We reserve the right to modify product specifications without prior notice.

[6] Different devices may have a different best format for usage. It is recommended to format the device before use to ensure the correctness and the integrity of the SSD.

[7] (1): We can use any of the above driver ICs. Basically, they do not change the performance and basic specifications.

[8] (2): We may change any type of memory chip for any product line without notice.
