A-RAY 2242 NGFF M.2 S700 256GB

DESCRIPTION

S700 256GB is an SSD hard drive using a connection interface NGFF M.2 2242 controller. This is a SSD Smart Series that delivers read/write speeds up to 550/500 MBps and Support TRIM, NCQ, S.M.A.R.T, ECC, Wear-leveling. System Support: Windows XP/Win7/8/10/11, Mac OS, Linux, embedded operating systems used in control, measurement, and applications such as: Music server, Automation control....

Precautions:

- [1] The speed was tested by A-RAY and for the reference only.
- [2] 1GB=1,000,000,000 Bytes. In OS system, it would be displayed as 1,000,000,000 Bytes/1024/1024/1024 = 0.93GB [3] Definition and conditions of TBW (Terabytes Written)are based on JEDEC standard
- [4] Transmission speed will vary according to different hardware/software conditions, therefore the data can only use for basic reference.

NOTES:

- [5] We reserve the right to modify product specifications without prior notice.
- [6] Different devices may have a different best format for usage. It is recommended to format the device before use to ensure the correctness and the integrity of the SSD.
- [7] (1): We can use any of the above driver ICs. Basically, they do not change the performance and basic specifications. [8] (2): We may change any type of memory chip for any product line without notice.
